one-way mirror window bird feeder instructions

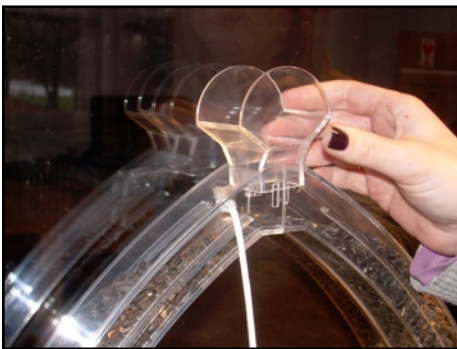

Mount on CLEAN window

Push to secure all four cups.

Your feeder arrives fully assembled. Clean the outside of your chosen window carefully. Mount the feeder in above freezing weather, and make sure the suction cups are pliable before attaching. When in place, push firmly on the end of each landing perch to make sure each suction cup is fully secured. (Confirm from the view inside the window.) Periodically remove and clean the feeder with warm water and mild soap before reattaching to a freshly cleaned window.

The cap and chimney turns upside down for easy filling.

**Your feeder comes with a 30 day return policy and warranty.
